

SMART - ERGONOMIC - AFFORDABLE

# IMPULSION®

CONTRA-ANGLES FOR IMPLANTOLOGY

SMALLEST HEAD  
ON THE MARKET!\*

\*For latch-type head only.

Smart solution

anthogyr

A global solution for dental implantology

anthogyr's newest line of contra-angles **iMPULSiON**® for implantology is suitable for the complete implant surgical protocol : from bone crest preparation to implant insertion.

The ultra-miniature latch-type head offers optimal working comfort with maximum visibility of the implant site.

The **iMPULSiON**® handpieces are thermo-disinfectable so as to meet high standards of asepsis.

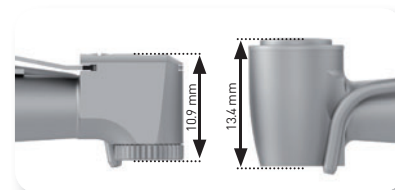

The **iMPULSiON**® **Control** handpiece is equipped with an adjustable stop system that offers total safety as well as high precision while drilling.

Meeting the demands for a lower cost without any concessions in quality.

### THE MAIN ASSETS

- Smallest head on the market for easier access in case of restricted interdental space and unequalled visibility\* !
- The best quality/price ratio !
- Optimal handgrip.
- Torque of up to 50 N.cm.
- **Adjustable depth stop system** : total safety and minimized size (for **iMPULSiON**® **Control**).
- Double irrigation system.
- Thermal disinfection for impeccable maintenance !

\* For latch-type head only
